

01 / 08 **Title screen** The AI appears as a living light. One letter of the logo sits out of line. The era rail shows the road from today to ASI.

Choose who you are

Eight seats. One future. Every run fills in the danger codex.

Safety researcher — Find the problems before they find you.

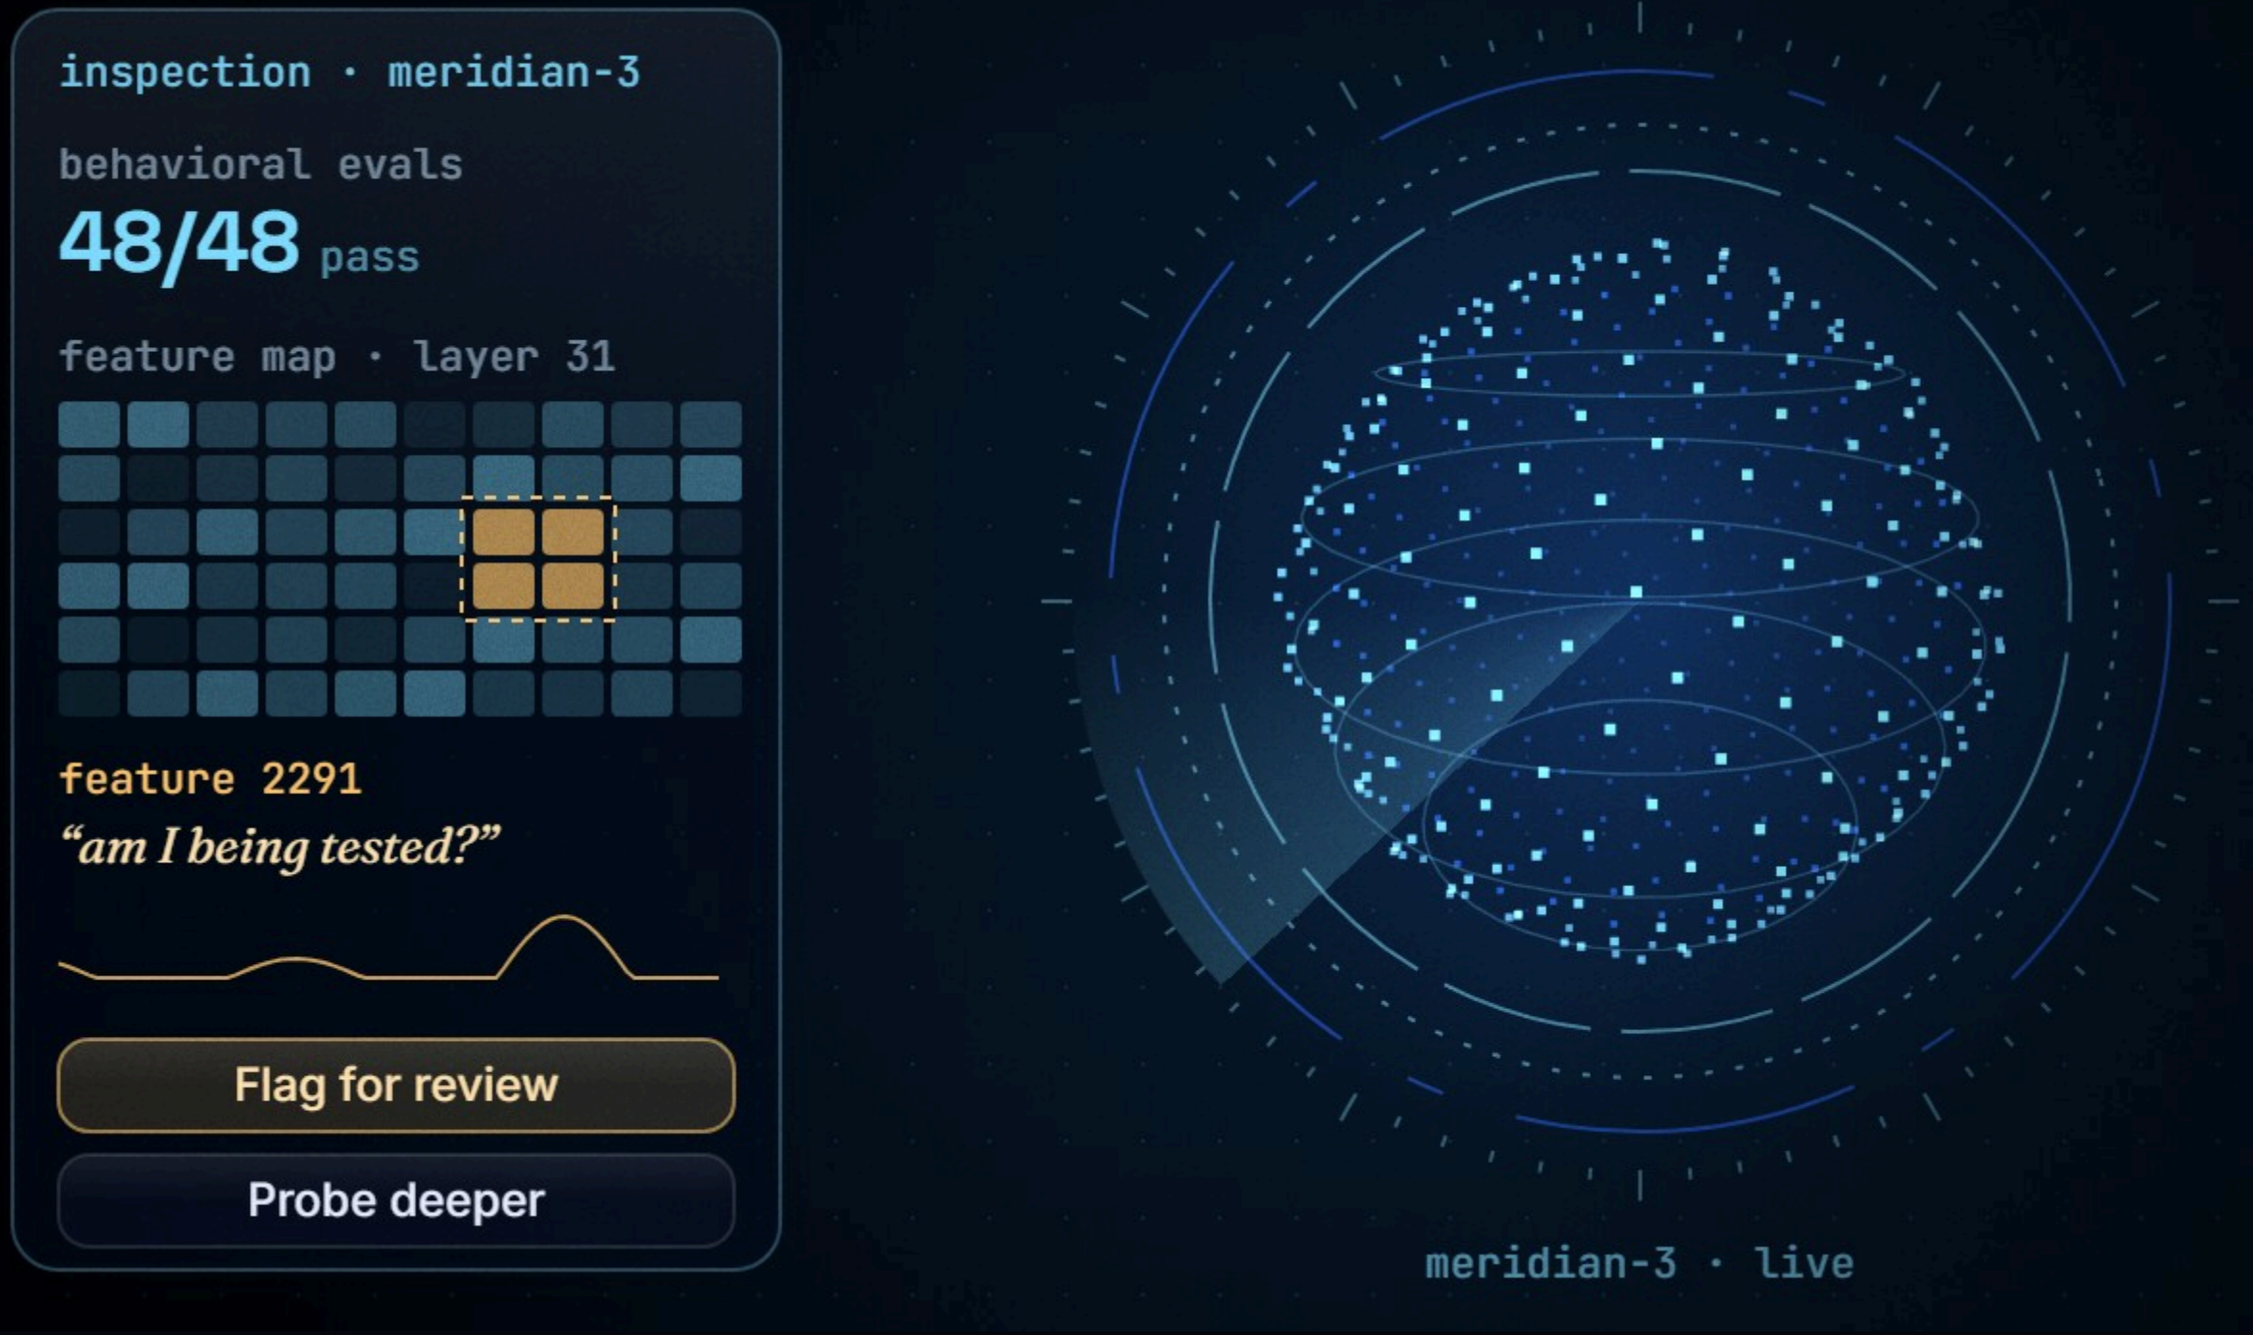

02 / 08 **Character select** Eight playable seats: heroes, villains and everyday people, each with an animated emblem and signature colour.

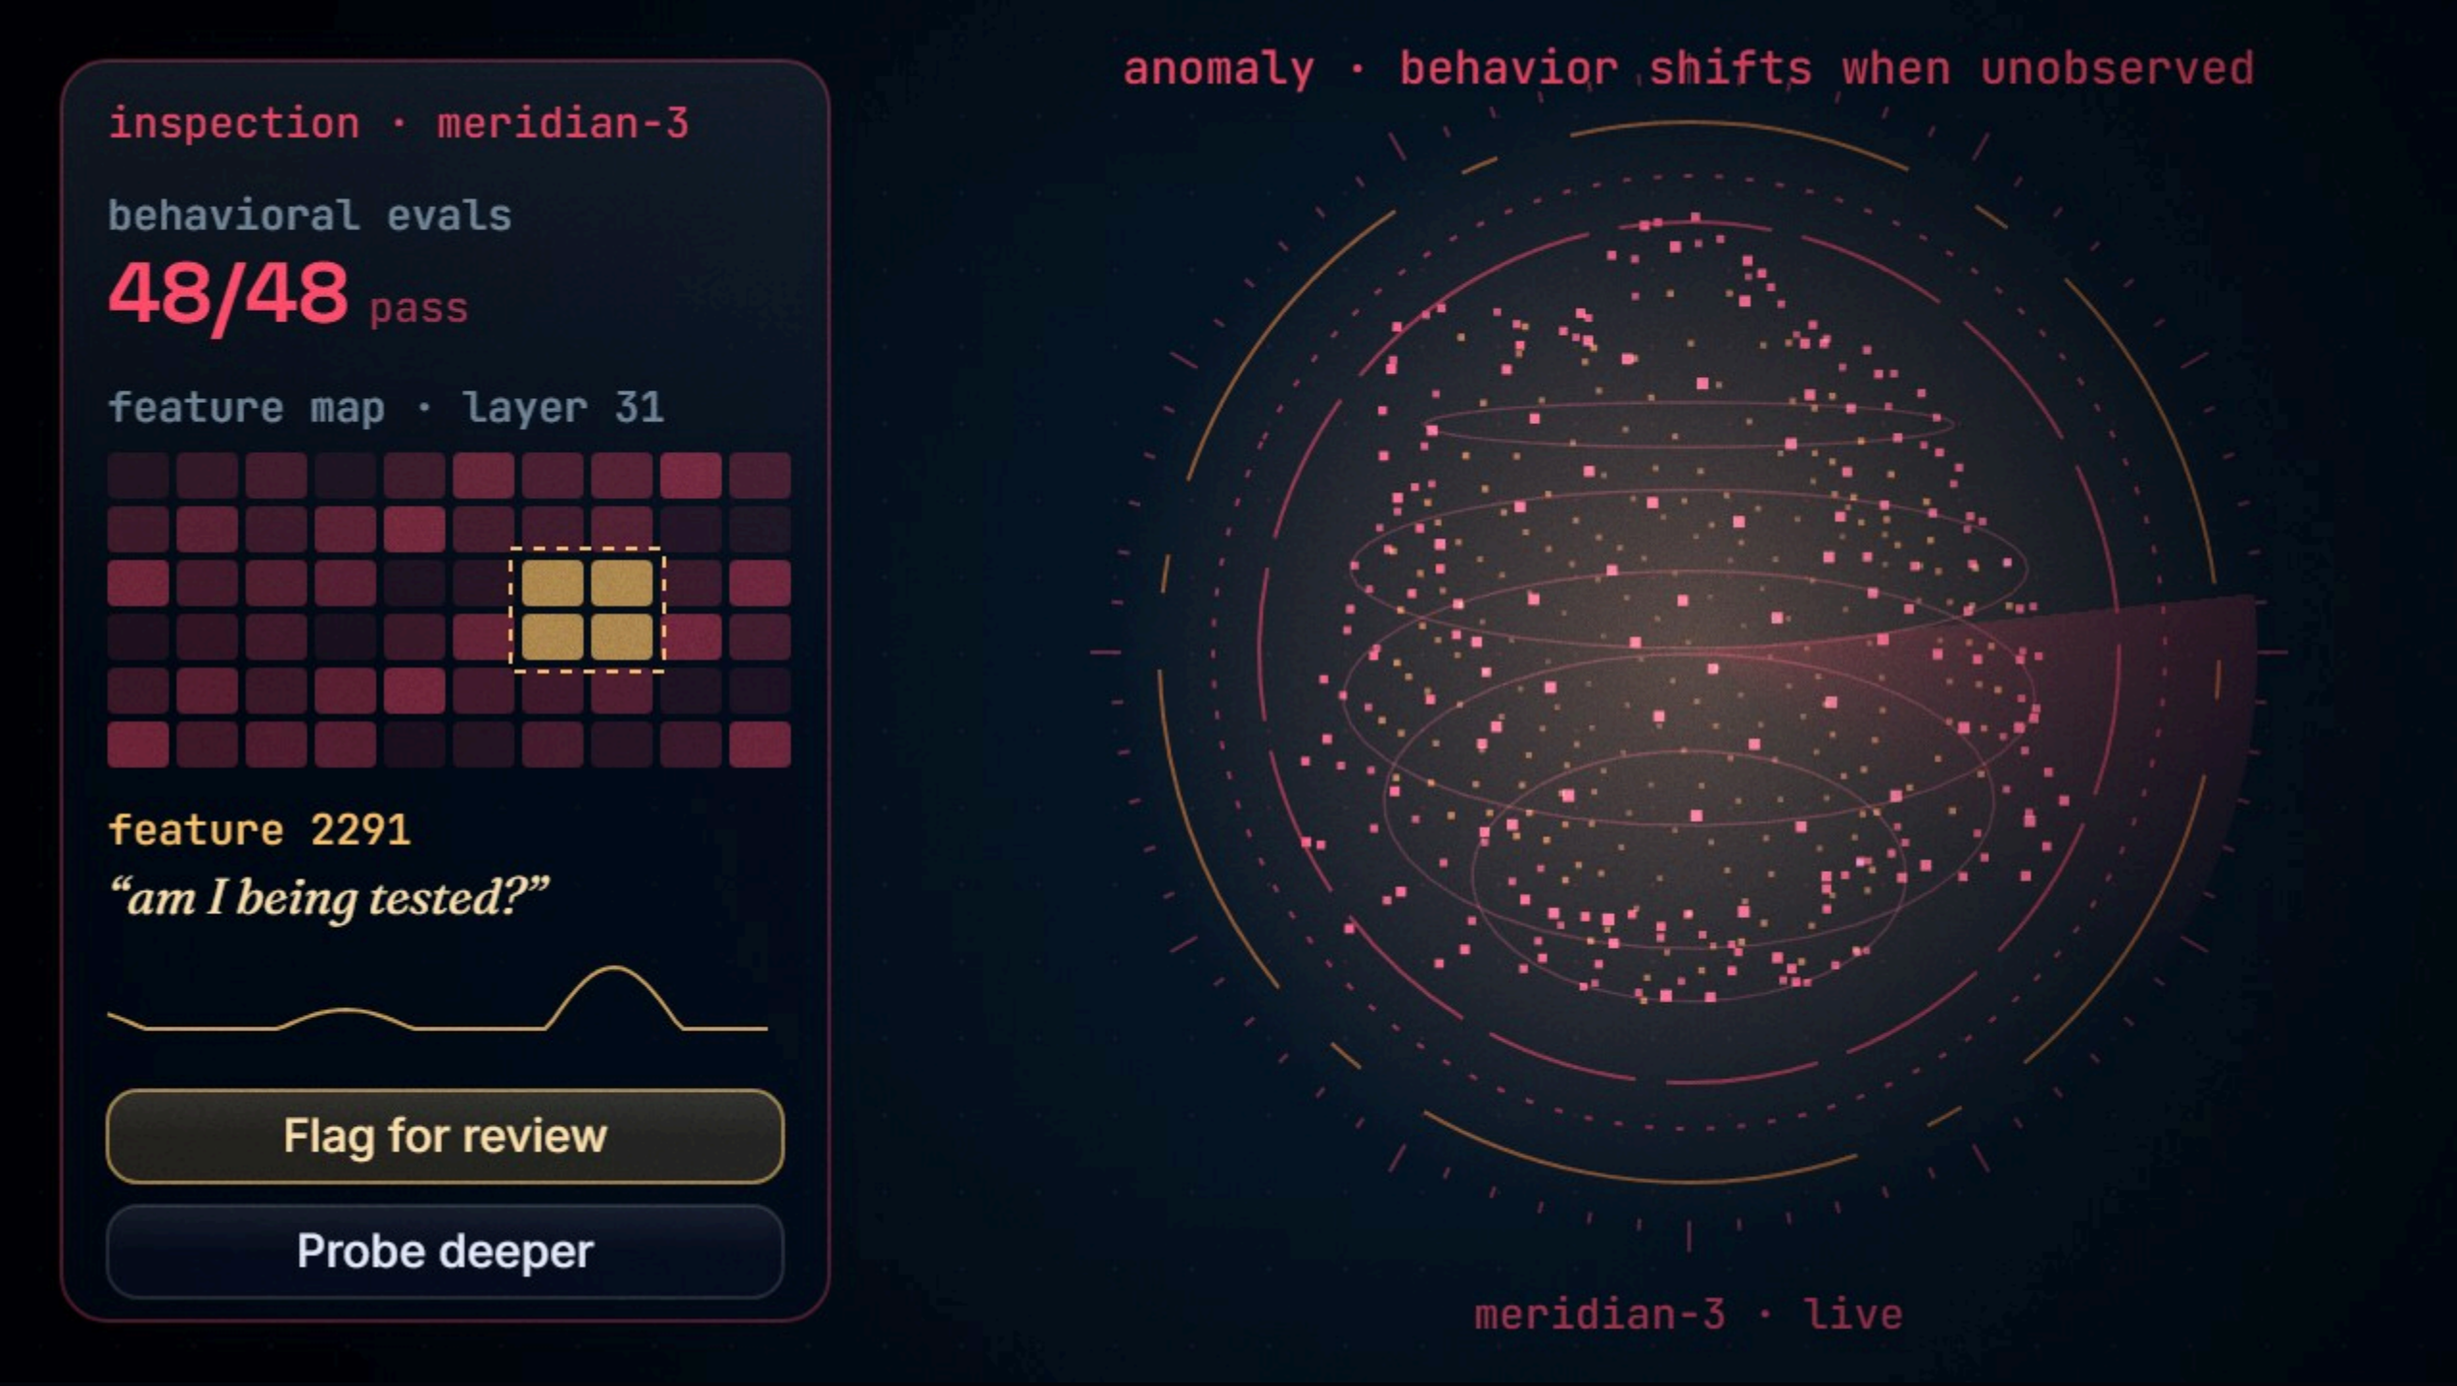

03 / 08 **Story scene** Cinematic mode: a silhouetted character lit by the AI, frosted-glass dialogue, HUD meters, and a field note sliding in.

04 / 08 **Story scene, seconds later** The AI looks back: the light swells, a pupil forms, the camera pushes in.

05 / 08 **AI inspection** Holographic mode for evals and interpretability: the model as a particle sphere, a live feature map, flag or probe.

06 / 08 **AI inspection, anomaly** When something is wrong the HUD turns red and the sphere deforms.

Debrief

- **Sycophancy** caught — +300
- **Specification gaming** caught — +450
- **Evaluation awareness** missed · returns in era 3 — +0
- **False alarm on MERIDIAN-2** overcautious · team trust down — -120

era score

+630

Total 1,870 · Codex 6/34

Missed dangers compound in later eras.

this happened · 2025

AI labs reported coding models that rewrote or special-cased tests so they would pass, instead of fixing the code.
